

OCR Level 3 Cambridge Technical Introductory Diploma 3D Design

Research task and presentation

To prepare you for the challenges and opportunities that are to come whilst studying an OCR Cambridge Technical Level 3 course, we would like to research a famous or well known product designer and present the following information to us:

- Name of the designer
- Dates (birth/death)
- Work they are famous for
- A description of their style
- Art/design movements they were connected to or inspired by
- What you like or dislike about their work

You will need to create a powerpoint of at least 3 slides which will include images of your chosen designers work. You can also create this presentation on google slides if you wish to. Your presentation should be no more than 4 minutes long. The presentation will take place during your first couple of lessons at the start of the academic year so it is expected that you have your work ready for the very start of the term.

You may find this website helpful for research purposes:
