

## Psychology A-level

**Task One:** Create three mind maps on the following questions:

1. What is psychology?
2. What are the different approaches in psychology? Explain the main ideas of each one. You should include:
  - The behaviourist approach
  - Social learning theory
  - The cognitive approach
  - The biological approach
3. What are the different careers in psychology that you can pursue and what does each one involve? You should include :
  - Clinical psychology
  - Educational psychology
  - Forensic psychology
  - Occupational psychology
  - Counselling
  - Try to find some other careers too

**Task Two:** Research at least one of the famous psychological studies listed below. Do you think the results would be the same if this experiment was repeated in 2023? Why or why not? Would you be able to carry out this research today? Why or why not?

- Asch study on conformity
- Stanford prison experiment
- Harlow's cloth monkey experiment
- Bobo doll experiment
- The Kitty Genovese case

You will be completing a **mini test** within the first few weeks of the course on the information gathered from these tasks, so please make sure they are completed and handed in to Ms. Swann or Ms. Hine in your first lesson.
